

Evermount Capital

Quant SaaS for the Future of Investing

Problem

Retail investors lack access to hedge fund-grade quant tools. Traditional funds are expensive, inflexible, and opaque.

Solution

Evermount = SaaS + Quant hybrid. Real-time dashboards, signals, and performance-linked fees.

Business Model

SaaS Subscriptions (\$50–\$500/month tiers). Performance Fee (15–20% of net gains). Outperformance Bonus (+5–10% above benchmarks).

Market Opportunity

\$3.8T hedge fund industry. 200M+ underserved retail traders. Africa = fastest growing fintech adoption.

Traction (2025)

<100 investors onboarded privately. KYC-lite & AML policies established. Early SaaS revenue + positive trading results.

Competitive Edge

Feature	Traditional Funds	Evermount
---------	-------------------	-----------

Lock-in	6+ months	30–60 days
Fees	5% + 10% perf.	SaaS + 15–20% perf.
Transparency	Limited	Real-time dashboard

Financial Projections (3 Years)

Yr 1: \$250K ARR + \$400K perf. fees. Yr 2: \$1M ARR + \$1M perf. fees. Yr 3: \$2.5M ARR + \$3M perf. fees.

Team

Daniel Mawioo (Founder/CEO). Tech Co-Founder (Quant/AI lead). Advisors (Compliance + Finance).

Ask & Vision

Raise \$500K Seed at \$3.5M valuation. Scale to 1,000+ clients in 12 months. Long-term: 'Robinhood of Quant SaaS' for Africa & beyond.
