

Evermount Capital

Quant SaaS for the Future of Investing

Problem

Retail investors lack hedge-fund grade quant tools. Traditional funds are expensive (5% fees + lock-ins), opaque, and rely on human managers prone to emotional bias and underperformance.

Solution

Evermount.co = SaaS + Quant Hybrid. - Automated quant strategies + AI/ML-driven signals -
Real-time dashboards & reporting - Performance-linked fees, no long lock-ins - Transparent, fair,
tech-first investing

Technology Edge

- Quant Computing: processes millions of datapoints faster than human analysts - AI/ML
Automation: adaptive models that evolve with market dynamics - 24/7 Execution: no human
fatigue, consistent alpha - SaaS Scalability: API-driven, borderless infrastructure

Business Model

- SaaS Subscriptions: \$50–\$500/month - Performance Fee: 15–20% of net profits -
Outperformance Bonus: +5–10% above benchmarks Hybrid model = predictable ARR + scalable
upside from trading success.

Market Opportunity

- \$3.8 Trillion global hedge fund industry - 200M+ underserved retail traders - Africa = fastest growing fintech adoption Evermount = first mover in Quant SaaS for Africa with global potential.

Traction (2025)

- <100 investors onboarded (friends/family, private) - SaaS MVP live with early subscription revenue - Tiered KYC & AML policies implemented - Positive quant trading results Proof of product-market fit at small scale.

Competitive Edge

Feature	Traditional Funds	Evermount
Fees	5% mgmt + 10% perf.	SaaS + 15–20% perf.
Lock-in	6+ months	30–60 days
Transparency	Periodic reports	Real-time dashboards
Strategy	Human managers	AI/ML + Quant computing
Scalability	Geography-limited	Global SaaS API-driven

Financial Projections (3 Years)

Year 1 (2026): 500 clients → \$250K ARR + \$400K perf. fees Year 2 (2027): 2,000 clients → \$1M ARR + \$1M perf. fees Year 3 (2028): 5,000 clients → \$2.5M ARR + \$3M perf. fees Break-even by Year 2, profitability scaling with ARR growth.
