

Evermount Capital

Quant SaaS for the Future of Investing

Problem

- Retail investors lack hedge-fund grade quant tools
- Traditional funds: high fees (5% + 10% perf.), long lock-ins
- Opaque reporting, limited transparency
- Human managers prone to bias and underperformance

Solution

- Evermount = SaaS + Quant Hybrid
- Automated AI/ML trading strategies
- Real-time dashboards & reporting
- Performance-linked fees, no lock-ins
- Transparent, fair, tech-first investing

Technology Edge

- Quant computing: processes millions of datapoints rapidly
- AI/ML automation: adaptive, evolving models
- 24/7 execution: consistent alpha, no human fatigue
- Scalable SaaS: API-driven, borderless infrastructure

Business Model

- SaaS subscriptions: \$50–\$500/month tiers
- Performance fee: 15–20% of net profits
- Outperformance bonus: +5–10% above benchmarks
- Hybrid model = predictable ARR + upside from trading success

Market Opportunity

- \$3.8T global hedge fund industry
- 200M+ underserved retail traders worldwide
- Africa = fastest growing fintech adoption
- Evermount = first mover in Quant SaaS for Africa

Traction (2025)

- <100 investors onboarded (friends/family, private)
- MVP SaaS dashboard live with early revenue
- Tiered KYC & AML policies implemented
- Positive quant trading results achieved

Competitive Edge

- Lower fees vs traditional funds
- Flexible 30–60 day access, no 6+ month lock-in
- Real-time dashboards vs periodic reports
- AI/ML + Quant computing vs human-only managers
- Global SaaS scalability

Financial Projections (3 Years)

- Year 1 (2026): 500 clients → \$250K ARR + \$400K perf. fees
- Year 2 (2027): 2,000 clients → \$1M ARR + \$1M perf. fees
- Year 3 (2028): 5,000 clients → \$2.5M ARR + \$3M perf. fees
- Break-even expected by Year 2
